

YOURI SEIDEL

COMMUNICATION & MULTIMEDIA DESIGN STUDENT

I'm a young creative who loves creating thoughtfull, modern visuals that are more than just some pixels on a screen or ink on paper. I started editing videos at the age of fifteen, which was also when I first discovered web design and code.

So far, my work for school and clients has focused mainly on web design, web development, and brand identity. In my free time, I also enjoy creating motion graphics and highlight edits in Adobe After Effects and Premiere Pro. I'm always open to new ideas, collaborations, and creative challenges.
